

Year 1 | Geography | Term 3 and 4

Prior Knowledge	During their EYFS year children will have been exposed to simple maps. They will identify what a map is, and why it is used. They will have begun to use directional language; near, far, left, right. They will be able to identify simple locations on a map in relation to other locations/landmarks. They will have an understanding of the Nile river during their learning in term 6.
New Knowledge:	<p>During terms 3 and 4, children will develop an understanding of the location for their book - 'The Sail and The Whale'.</p> <p>The term 3 focus will be on locational knowledge of the wider world. They will learn the seven continents and five oceans of the world and will use directional language to identify the relationship between them. They will begin to develop understanding of a four-point compass.</p> <p>The term 4 focus will be The United Kingdom. Children will be able to identify the four nations of the UK and their capital cities both verbally and on a map. Children will use different types of maps to identify their home town - 'Bromley' and describe the location and its features. Children will be exposed to knowledge around both human and physical geography of their locality.</p>
Dependant Knowledge:	Children will develop their use of a four-point compass during year 2. They will then move on to using an eight-point compass in KS2, making their references more accurate. Children will develop a more detailed understanding of several continents and countries, as well as comparing these to their own locality.

Term 3				
Lesson	Objective	Resources	Content	Activity/Task
1	To be able to identify the seven continents.	Atlases Maps Globes	Children will be able to identify the seven continents. They will be able to identify these using different resources. Children will be exposed to terms equator, Northern and Southern Hemisphere to locate continents. Children will develop an understanding of north, east, south, west and will be encouraged to use these terms during their learning.	Identifying the continents on different maps of the world Identifying the continents using different media (books, maps, ipad).
2	To be able to identify the five oceans of the world	Atlases Maps Globes	Children will be able to identify the oceans of the world and locate them on a map. They will be exposed to terms equator, Northern and Southern Hemisphere to locate oceans and their relationship with continents.	Identify the oceans on different maps of the world Identify the oceans using different media (books, maps ipads)

			Children will develop an understanding of north, east, south, west and will be encouraged to use these terms during their learning.	Identify continents and their relationship to the oceans (compass points) Identify oceans and their relationship to the continents (compass points)
3	To understand the location and characteristics of Europe	Atlases Maps Globes	Children will be able to identify Europe and describe its location with in the Northern Hemisphere. They will develop an understanding of its surroundings and its physical structure. They will know that the UK is within this continent.	Identify Europe on a map Describe Europe – climate zone, hemisphere, surrounding oceans
4	To understand the location and characteristics of Asia and Australasia	Atlases Maps Globes	Children will be able to identify Asia and Australasia on a map and describe its location with in hemispheres. They will be able to explain the surrounding oceans of these continents.	Locate Asia and Australasia on a map of the world Describe the continent, identifying surrounding oceans, hemisphere
5	To understand the location and characteristics of Africa	Atlases Maps Globes	Children will be able to identify Africa on a map and describe its location with in hemispheres. They will be able to explain the surrounding oceans of these continents.	Identify Asia on a map Describe Asia – climate zone, hemisphere, surrounding oceans
6	To understand the location and characteristics of Antarctica		Children will be able to identify Antarctica on a map and describe its location within hemispheres. They will be able to explain the surrounding oceans of these continents.	Identify Antarctica on a map Describe Antarctica- climate zone, hemisphere, surrounding oceans.
